

SURGICAL ASSISTANT TRAINING

Laparoscopic Surgical Assistant Workshop

The Laparoscopic Surgical Assisting Workshop is designed to introduce, refresh, and upskill perioperative staff in the core principles of laparoscopic assisting. It combines theory with hands-on practice to build the knowledge, confidence, and competency required to assist safely and effectively in laparoscopic procedures.

Delivered in your hospital setting, the workshop offers a safe, inclusive environment that promotes teamwork, clinical confidence, and continuous learning for perioperative professionals.

WORK SHOP FEATURES:

- Cost-effective training that boosts staff capability and satisfaction
- Pre-learning workbooks to support anatomical understanding
- Practical training using a range of telescopes and equipment across multiple stations
- Safe handling and correct use of various telescopes and cameras
- Critical thinking for intraoperative decision - making
- Clear understanding of scope of practice: accountability, delegation, and direction
- Ergonomic focus on manual dexterity, movement efficiency, and safety
- Techniques for tissue handling, haemostasis, exposure, and port placement
- Managing complications and emergency scenarios, including conversion from laparoscopy to laparotomy
- Understanding the safe and effective use of electrocautery

This workshop equips perioperative staff with practical, professional skills essential for laparoscopic assisting. Its interactive format enhances patient safety and surgical outcomes, while building staff confidence, capability, and overall satisfaction - ultimately contributing to a higher standard of care across the surgical team.
